[Despatch Abstract.]

Water Supply — Siruguppa Panchayat (Bellary Dt.) — Papers recorded

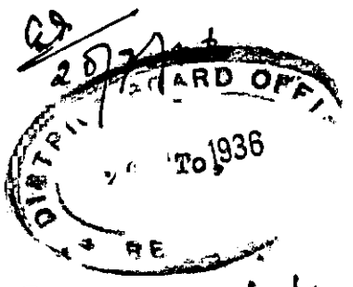
Panchayat Board Office Siruguppa
(Bellary District) Dated,30-6-36.

Reference 410/36

From,

M.R.Ry. J.Vencoba Charlu Garu,

Vice President incharge Panchayat Board
Siruguppa.



To 1936

The Secretary Local Self Government
Fort St: Georze
Madras.

CR 2004/36 Through the District Health Officer Bellary
and
the President District Board Bellary

Sir, Ref:- Town survey - protected water supply - Siruguppa - - town:-

---

I beg to represent the following facts for your kind consideration.

2. Siruguppa town has a population of 5773 people. It is a Major Union with an beriz about Rs.35000/-. The town is on the bank of the thungabhadra river and is surrounded by wet fields. The place is highly malarial.

3. Several Officers who inspected the Union, have been giving their suggestions to improve the town. They are (1) A sound drainage system and (2) protected water supply. The Pan-chayat Board has been trying to combat malaria by closing insa-nitary pits etc, and there is much yet to be done.

4. It has been remarked that there could be no sound drainage without a survey of the town. I submit a copy of the remarks of the Director Town Planning made in para 4 of his inspection notes No: D.P.H. 1528 dated, 15-10-1931. There are no proper side drains in the town except in two streets viz, Jwalada-bazaar and the main-bazaar. They are not in good condi-tion. Storm water stagnate on account of obstruction caused by pials and houses. The Panchayat Board feels that no useful purpose would be served if drains are constructed and that any attempt made in that direction would be a waste. The Gover-nment have been pleased in thier G.O.No: 1699 Rev: dated,14-6-17 and G.O.No: 1635 His: dated,8-8-29 to contribute 2/3 the cost of survey, provided the Panchayat Board bears 1/3 of the cost. The Panchayat Board,s resources are very limited. It cannot

afford to meet the cost. I therefore request that considering the havoc malaria has been playing in this ~~xxxxx~~ Union and it's poor finances, I request that the Government will please order the survey of the Union entirely at their cost. If however, this request is not favourably considered, I request that 1/3 of cost which the Union should bear, may be ordered to be collected in convenient instalments.

5. The water supply in the Union is far from satisfactory. The Siruguppa irrigation channal runs through the heart of the town people use it's water for drinking purposes. Thungabhadra--river water is unhealthy. Besides, people will wash their cattles in the channal. All these render the water unfit even for ordinary purposes. The water is unwholesome. People neverthless use the water because they have no other go. There are no fresh water wells in the town and the wells if dug are not likely to tap drinkable water as the sub-soil is mostly saline. People who are residing in the extention including Rev: Official's quarters are suffering inconvenieneee to get fresh water. There are only three wells in the Official's quarters but the water is bra--ckish and not fit for drinking purposes. In the summer, the yield of water in those wells will considerably decrease. Medical exa--mination of the water of those wells has disclosed that the water contains a high percentage of calcium injurious to health. I therefore submit that a protected water supply engage the imme--diate attention of the Local Board. In this connection, I beg to bring to the notice of the Government that Adoni Muncipality very recently dug wells in the Hagari river at Raravi a village only 5 miles distant from Siruguppa, and found the water supply from these wells adequate for the neesds of Adoni town. I there--fore request that Government will be pleased to provide water supply from the above wells. I therefore request Government to provide funds for the initial expenditure involved. As regards recurring expenditure, the Board will levy water-tax if ordered.

6. If however the water supply scheme to Adoni Munci--pality is not come off soon, I request that a scheme to supply water from the thungabhadra river which is two miles from the town

may be made, so that people may enjoy the benifit of a pro-
-tected water scheme.

7. Secondly I beg to represent that the population of the town is decreased by 400 as per subsequent census com-
-paring to the previous to this. I presume that it is due to malaria, water born deceases and congestion of the town. If the above requirements are provided, ~~x~~ at the interest of the suffering public, I sincerely submit that the condition of the to-n may improve. I therefore beg to request our benign Gove-
-rnment to refer the matter to the authorities concerned and do needful to fulfill the above requirements.

Soliciting favourable action.

4. A scheme for the "removal of congestion" was carried out in the pat, but the common mistake of limiting the sheme to the removal of the congestion in the street by widening causing an increase of congestion in the adjacent houses was made. Moreover complaint is made that the frontages are gradually advancing over the areas cleared. Prevention of encroachment should be possible by reference to the aquisition records with respect to these streets but as no street survey has been made it is no doubt difficult to locate the boundaries with any ass--urance. A street survey would under the circumstances appear to be essential if conditions are not become worse. It must be sub--mitted that in many lanes the limit has almost been reached they could not be narrower without rendering it impossible for pede--strians to pass. The removal of the town to higher land would be the ideal but this is no doubt a council of perfection impo--ssible of realisation. Under the circumstances a street survey should be undertaken as soon as the finances can be provided.
